Technical Skills

Languages: C/C++, Python, Go, Bash, JavaScript, Solidity

Databases: MySQL, PostgreSQL, SQLite, Oracle SQL, ChromaDB

Frameworks/Tools: PyTorch, JAX/Flax, FastAPI, Docker, Git, Linux, Blockchain, Hugging Face, Unsloth AI

Projects

DMoEBERT – Sparse Mixture-of-Experts for NLU (Thesis) [🔗](#)

- Designed a scalable sparse Mixture-of-Experts encoder-only model for Natural Language Inference.
- Trained 23M/45M models from scratch under tight compute constraints on SNLI, SST-2, QQP, and AG News.
- Outperformed BERT-base (LoRA PEFT) with 13.5× fewer FLOPs and 5.3× lower memory.

Stable Diffusion from Scratch [🔗](#)

- Implemented a full Denoising Diffusion Probabilistic Model (DDPM) in PyTorch.
- Built attention-enhanced U-Net and Variational Autoencoder (VAE) for latent-space compression.
- Optimized training using a two-stage approach for stability and low memory use.

Real-Time Microphone Transcription Web Application (FastAPI + SQLite + WebSockets) [🔗](#)

- Built real-time browser-to-backend transcription system using WebSockets + Vosk ASR (CPU-only).
- Implemented React frontend for live microphone capture, FastAPI backend for streaming audio, partial/final transcription, and SQLite session storage (transcript + metadata).
- Dockerized deployment with automated tests using pytest.

Course Finder – AI-Powered Recommendation System [🔗](#)

- Built recommendation engine using Sentence Transformers + ChromaDB.
- Integrated FastAPI backend, Streamlit UI, and Dockerized deployment.
- Designed a multi-factor ranking system (similarity, rating, difficulty).

Sharma's Drive – Decentralized File Storage Platform [🔗](#)

- Developed a blockchain-based file sharing (e.g., audio, image, video, zip) platform using Solidity smart contracts.
- Integrated Node.js backend and React frontend for secure upload and retrieval.

Task Management API (FastAPI + PostgreSQL) [🔗](#)

- Designed RESTful API with full CRUD functionality.
- Built using FastAPI, PostgreSQL, and Docker for containerized deployment.

Chomp Chase – AI Maze Race Game [🔗](#)

- Generated random mazes via DFS with backtracking and implemented AI opponent using the A* pathfinding algorithm.

Education

B.Sc. in Computer Science and Engineering

Khulna University of Engineering & Technology (KUET)

2020–2025

Higher Secondary Certificate (HSC)

Govt. M.M. City College, Khulna — *Board Merit Position: 23*

2017–2019

Technical Writing

- Contributor on Medium — write technical deep-dives on AI, systems, and programming. Notable Articles :
 - The No-Nonsense Guide to Attention, LinearAttention, GPU Memory & FlashAttention : Math to Code [🔗](#)
 - Understanding Vision Transformers from First Principles : Theory & Code [🔗](#)
 - The Math Behind Stable Diffusion [🔗](#)
 - Let's Take a SQL Adventure: From Theory to LeetCode [🔗](#)
 - Let's Explore Go: From Hello World to Data Structures [🔗](#)
 - Let me teach u Bash : From 'hello world' to User Management [🔗](#)
